Elektromarine automation leverer komplette tavlesystemer af højeste kvalitet til offshore, maritime installationer, den industrielle sektor samt bygge- og anlægssektoren. Desuden produceres graverede skilte og træemballage. Elektromarine automation er fabrikat uafhængig leverandør. Firmaets projektingeniører kan dermed designe og skræddersy enhver leverance til kundens krav og behov.

Opgaver løses inden for følgende hovedkategorier:

- Styretavler
- MCC/Multi Drawer
- Motorstartere
- Hovedtavler
- Underfordelinger
- Container installationer

Inden for hovedkategorierne tilbyder Elektromarine automation: Engineering, produktion, certificering, programmering, test, døgnservice og termografering. Udførelsen af enhver opgave sker i tæt samarbejde med kunden, så leveringstid og pris altid overholdes. Certifikater og nødvendig dokumentation er en del af enhver leverance. Elektromarine automation har mange års erfaring samt en unik kompetence inden for levering til den danske og norske offshore sektor og har indgående kendskab til internationale standarder og maritime klassificeringer.

Elektromarine automation delivers high quality electrical panels and complete panel systems to offshore and maritime installations, ships and onshore buildings and facilities. In addition Elektromarine automation produces engraved signs and wood packaging. Elektromarine automation is an independent panel builder not tied to any brands. This allows the project engineers at Elektromarine automation to design and tailor each and every delivery in accordance with the customer's requirements.

Operates within the following main categories:

- Control cabinets
- MCC/Multi Drawer
- Electric motor starters
- Main distribution boards
- Sub-distribution boards
- Container/module installations

Within the main categories Elektromarine automation offers engineering, production, certification, programming, testing, 24 hour service and thermal imaging. The products are made in close cooperation with the customer so delivery time and price are always met. All the requisite certificates and documentation form an integral part of every delivery. Elektromarine automation has extensive experience and a unique pool of skills regarding deliveries to the Danish and Norwegian offshore sector and has in-depth knowledge of international standards and maritime classifications.
